

**EVEREST****EVEREST IST-2002-001858****D14*****Simulation tools: final version capabilities and features*****Contractual Date of Delivery to the CEC: 28-February-2005****Actual Date of Delivery to the CEC: 14-March-2005****Editor: Avelina Vega (TID)****Author(s): see list****Participant(s): UPC, KCL, PTIN, TID, TEL****Workpackage: WP3****Est. person months: 3****Security: PU****Nature: Report****Version: 001****Total number of pages: 18****Abstract:**

This deliverable provides an up-dated version of the link and system level simulators developed in WP3 and reported in D07. This version includes the refinements coming from the new envisaged target scenarios defined in D13 as well as new features envisaged after the first evaluation of the RRM/CRRM algorithms

**Keyword list: Simulation tools, Link level simulation, System level simulation, UMTS, GERAN**

## **DISCLAIMER**

The work associated with this report has been carried out in accordance with the highest technical standards and the EVEREST partners have endeavoured to achieve the degree of accuracy and reliability appropriate to the work in question. However since the partners have no control over the use to which the information contained within the report is to be put by any other party, any other such party shall be deemed to satisfied itself as to the suitability and reliability of the information in relation to any particular use, purpose or application.

Under no circumstances will any of the partners , their servants, employees or agents accept any liability whatsoever arising out of any error or inaccuracy contained in this report (or any further consolidation, summary, publication or dissemination of the information contained within this report) and/or the connected work and disclaim all liability for any loss, damage, expenses, claims or infringement of third party rights.
